The map above is just a section of the one online that shows all 50 trees that have now been planted to mark the 50th Anniversary of the designation of the Ramsgate Conservation Area. To see the location of every tree, visit the interactive map where the plus sign will expand the map and a click on any coloured dot will reveal the tree name.

We would just ask that you visit it from time to time to check if it's looking OK and if you have concerns – report it to us. This campaign aims to ensure that these trees remain healthy and beautiful for generations of future Ramsgate residents to enjoy! To help us fund the maintenance for the first two years while the trees establish, we would like to ask that you make a donation of £40 towards your tree's upkeep. *Your contribution will greatly assist us to finance the maintenance costs over the crucial first two years until the trees become established.*

To adopt a tree please email the Ramsgate Society and we will get back to make arrangements. You will have the opportunity to choose the tree you wish to adopt. You will be given details about your tree, its name and 'tree story' - location, planting history, details about how it likes to grow and **what to look out for.**
